

## Special Issue

# Hydrophysical Parameters and Gases in Ice-Covered Lakes

### Message from the Guest Editors

Climate warming is changing the physical regime of seasonally frozen lakes, especially the duration of freeze-up, water temperature, mixing regime and gas regime. These factors have a significant impact on the functioning of aquatic ecosystems in the annual cycle. Despite the increased interest in the winter period, we still know very little about how hydrophysical processes and ecological cycles in ice-covered lakes are changing as the climate warms. It is extremely important to fill this gap in order to understand the prospects for the development of aquatic ecosystems in the new conditions.

The main purpose of this Special Issue is to attract articles devoted to assessments of changes in the thermohydrodynamics and gas regimes of ice-covered lakes against the backdrop of climate warming.

The general topics of this Special Issue of *Water* are as follows[...]

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
