

Special Issue

Water Resources Management and Extreme Events

Message from the Guest Editors

for this Special Issue, we welcome different types of contributions, and themes of interest include (but are not be limited to): flooding and droughts and their respective impacts; spatial and urban planning; early warning systems; estimation of losses; risk communication; meteorology; integrated analysis; risk mitigation; infrastructures; nature-based management; heritage; transport; legal assessment; vulnerability analysis; public participation or case studies. We especially encourage submissions that examine results from a socioeconomic perspective, considering policy and governance determinants.

Guest Editors

Dr. Joaquín Melgarejo Moreno

University Institute of Water and Environmental Sciences, University of Alicante, 03690 Alicante, Spain

Dr. Patricia Fernández-Aracil

Department of Applied Economic Analysis, University of Alicante, 03690 San Vicente del Raspeig, Spain

Deadline for manuscript submissions

closed (20 October 2022)

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
