

Special Issue

Marine Biology: Biodiversity and Conservation

Message from the Guest Editor

Marine ecosystems produce a significant amount of goods and services, although they are threatened by multiple natural and human-driven stressors that alter their function and reduce their biodiversity. However, efforts to protect these valuable ecosystems are increasing worldwide. The main goal of this Special Issue is to bring together current research and reviews on environmental impacts on marine biodiversity and how these can be mitigated and remediated. Submissions addressing new monitoring methods and discrimination between different stressors that may overlap in impacted areas, or that describe success experiences of environmental management that contribute to protect marine ecosystems and maintain their role as producers of goods and services, are also welcomed.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
