

Special Issue

Water Pollution and Treatment: Challenges and Opportunities

Message from the Guest Editor

Papers are invited on any aspect of treatment and technology for water and wastewater treatment at a continuum of scales, ranging from small-scale portable technology all the way to precinct or city scales. Papers with a focus on integrated solutions for small or remote communities are particularly welcome. Multidisciplinary papers across engineering, science, and social sciences are encouraged.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.
