

Special Issue

New Aspects of Occurrence and Removal of Emerging Pollutants

Message from the Guest Editors

The planned Special Issue will include the following topics: Emerging pollutants (EPs) in waters; Endocrine active compounds in water environments; Occurrence and fate of emerging contaminants in various water bodies; Advances in water purification processes; New advanced oxidation processes; Environmental risk assessment, the toxicity of emerging contaminants, and their fate in the food chain; Leachates of municipal landfills, their impact on groundwater quality, and problems with their utilisation; Analytical methods employed to monitor the presence of EP in waters and for the monitoring of water purification processes; Phytoremediation of wastewaters; Purification of industrial wastewater; Sorption methods in wastewater treatment.

Guest Editors

Prof. Dr. Joanna Karpińska

Department of Analytical and Inorganic Chemistry, Faculty of Chemistry, University of Białystok, Białystok, Poland

Dr. Urszula Kotowska

Institute of Chemistry, Faculty of Biology and Chemistry, University of Białystok, Białystok, Poland

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR
CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique
(CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane,
Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
