

Special Issue

Water Consumption and Water End-uses in Buildings

Message from the Guest Editor

Water consumption in buildings has been a matter of concern all over the world as the number of cases has been steadily on the increase. Such consumption and water end-uses vary according to the type of building, culture, climatic conditions, and so on. In order to properly apply water efficient measures in buildings, water consumption and water end-uses need to be better analyzed. Thus, a Special Issue on "Water consumption and water end-uses in buildings" aims to publish such papers from all manner of buildings, including houses, multifamily residential buildings, commercial buildings, schools, airports, etc. This would provide a valuable overview of scenarios in different parts of the world.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
