

Topical Collection

Water Policy Collection

Message from the Collection Editors

This **special topic** aims to encourage dialogue between researchers, policy makers and practitioners on the issue of improvement of water policy and related management practices, through an interdisciplinary perspective, including economics, political science and social sciences. In this context, high quality papers are sought illustrating original research. Papers focusing on cutting edge innovation in policy mechanisms and implementation strategies are especially encouraged.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief
