

Special Issue

Water and Circular Cities

Message from the Guest Editors

This Special Issue follows the idea that water is at the center of the concept of circular cities. Circular water management is closely linked and facilitates sustainable built environment, recovery of resources, and urban farming based on local resources. The Special Issue will embrace the knowledge from the COST Action CA17133 Circular City (Implementing nature based solutions (NBS) for creating a resourceful circular city), which incorporates members from all 39 COST countries. The Action represents an interdisciplinary platform for connecting city planners, architects, system designers, economists, engineers, and researchers from social and natural sciences that develop nature-based solutions in the urban landscape that facilitate circular economies based on the 3Rs (reduce, reuse and recover). [...] For further reading, please follow the link to the Special Issue Website at:

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
