

Special Issue

Role of Water in the Metabolism and Life of Living Organisms

Message from the Guest Editors

This Special Issue focuses on recent advances and future developments in the Role of Water in the Metabolism and Life of Living Organisms. Water is an area of permanent interest and concern for public health due to the causal relationship between the quality and quantity of water available to the population and the state of health. An incomplete summary of invited contributions includes:

- Modeling and simulation studies for the role of water in photosynthesis;
- Role of water in cell function;
- Role of water in seed germination;
- Water potential in plant biology;
- The primary role of water in the body;
- The role of water in the digestive mechanism;
- Development and evaluation of models for the role of drinking water in weight loss;
- Association of water and the process of maintaining the health of living organisms;
- Metabolic water (endogenous water) and exogenous water;
- The importance of water in a diet plan;
- The role of water in microbiology, hygiene, etc.

Guest Editors

Prof. Dr. Monica Butnariu

Chemistry & Biochemistry Discipline, Banat's University of Agricultural Sciences and Veterinary Medicine "King Michael I of Romania" from Timisoara, 300645, Calea Aradului 119, Timis, Romania

Dr. Radu-Vasile Bagiu

Department of Microbiology, Hygiene Discipline, "Victor Babes" University of Medicine and Pharmacy, Timisoara, Eftimie Murgu square, number 2, 300041, Romania

Deadline for manuscript submissions

closed (31 July 2021)

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST
