Psychosis in Women

Message from the Guest Editors

Whatever the form of psychosis, women do not necessarily present clinically in the same way as men. Age of presentation may differ as well symptoms, help seeking, progression, and response to treatment. Triggers for the development of psychotic reactions are often more prevalent in one sex than the other due to different rates of exposure. For instance, vulnerability during reproductive periods and the prescription of exogenous hormones are problems that are unique to women. The problems caused by psychosis also differ in men and women, whether they are problems of general health, victimization, violence, child bearing, child rearing, or tasks of caregiving or survival. This Special Issue of *Women* will explore these issues and will provide clinical recommendations for best practice.

Guest Editors

Dr. Susana Ochoa

Centro de Investigación Biomédica En Red de Salud Mental, Madrid, Spain

Prof. Dr. Mary V. Seeman

Department of Psychiatry, University of Toronto, Toronto, ON M5S 1A8, Canada

Deadline for manuscript submissions

30 December 2025

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Maria Grazia Porpora

Department of Maternal Infantile and Urological Sciences, Policlinico
Umberto I, Sapienza University of Rome, 00161 Rome, Italy

Author Benefits

High Visibility:

indexed within ESCI (Web of Science) and other databases.

Journal Rank:

JCR - Q2 (Womens Studies) Rapid Publication:
manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.1 days after
submission; acceptance to publication is undertaken in 4.7
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and
reviewer names published annually in the journal.
