1. School of Life Sciences, The Chinese University of Hong Kong, Hong Kong SAR, China
2. Institute of Environment, Energy and Sustainability, The Chinese University of Hong Kong, Hong Kong SAR, China

Deadline for manuscript submissions:

2 August 2024

Message from the Guest Editors

In this Special Issue, we aim to collect high-quality studies related to sustainable health and development. Innovations across disciplines with regard to SDGs are welcomed. In particular, we welcome studies attempting to address global challenges such as climate change, hazardous chemical wastes and environmental pollution. We are also interested in contributions that provide insights on how education initiatives and practice can lead to a sustainable society. This collection of studies is expected to help formulate solutions to address the grand challenges and develop interdisciplinary research directions for advancement to a sustainable world. Contributions may include (but are not limited to) the following themes:

- Climate change;
- Environmental issues;
- Food security and safety;
- Green chemistry and technology;
- Hazardous chemicals management;
- Hazardous waste;
- Healthcare waste;
- Pollution control;
- Sustainable agriculture;
- Sustainable development goals;
- Sustainable education;
- Sustainable health and well-being;
- Water pollution.
